Facility Information

Facility Name

Darigold, Inc. - Caldwell Facility

Street

520 Albany Street

Supplemental address

City

Caldwell

State

Idaho

Zip Code

83605

First Name

Scott

Middle Name

Last Name

Algate

Telephone Number

2084593687

Summary of past year's inspections, assessments, and corrective actions

1. Provide a summary of your past year's routine facility inspection documentation (see Part 3.1.2 of the permit). In addition, if you are an operator of an airport facility (Sector S) that is subject to the airport effluent limitations guidelines, and are complying with the MSGP Part 8.S.8.1 effluent limitation through the use of non-urea-containing deicers, provide a statement certifying that you do not use airfield pavement deicers containing urea (e.g., "*I certify that [name of airport] is in compliance with the effluent limitation guideline for airfield pavement deicing by not using airfield pavement deicers that contain urea.*"). [Note: Operators of airport facilities that are complying with Part 8.S.8.1 by meeting the numeric effluent limitation for ammonia do not need to include this statement.] *

During inspections, common items were discovered. Uncovered dumpsters, cleaned chemical drums without bungs, dirty equipment placed outside, patches of ground which were dirty were the most common discoveries. Some buckets and trash cans were also discovered.

2. Provide a summary of your past year's quarterly visual assessment documentation (see Part 3.2.2 of the permit) *

The visual samples all showed some colored occlusions, except Quarter 4 on Outfall # 5. It was common to see dark floating, settling and suspended solids. There was no oil sheen noticed from any of the visual observations. The only odor noticed was from the Quarter 2 sample set.

3. For any four-sample (minimum) average benchmark monitoring exceedance, if after reviewing the selection, design, installation and implementation of your control measures and considering whether any modifications are necessary to meet the effluent limits in the permit, you determine that no further pollutant reductions are technologically available and economically practicable and achievable in light of best industry practice, provide your rationale for why you believe no further reductions are achievable (see Part 6.2.1.2 of the permit). Enter "NA" if not applicable. *

The benchmark sampling demonstrated that the plant was over on all three characteristics for the year 2016. The plant is determining what the next steps are and if they are technologically feasible.

4. Provide a summary of your past year's corrective action documentation (See Part 4.4 of the permit). (Note: If corrective action is not yet completed at the time of submission of this annual report, you must describe the status of any outstanding corrective action(s).) Also describe any incidents of noncompliance in the past year or currently ongoing, or if none, provide a statement that you are in compliance with the permit. *

Dirty equipment is removed and bungs missing were replaced. Trash and buckets sitting outside were also removed. Dumpsters are still uncovered at times and there are still some patches of pavement that could be cleaned.

Certification Information

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations. 40 CFR 122.22 (d)
